STUDENT-LED STARTUP + LIVE PROTOTYPE

DON’T LOSE CUSTOMERS TO LANGUAGE BARRIERS.

AI receptionist · AI translator · Orders & bookings
Website + phone + in-store assistance

Built in Tampere. Designed for businesses worldwide.

The customer is here. The language is the barrier.

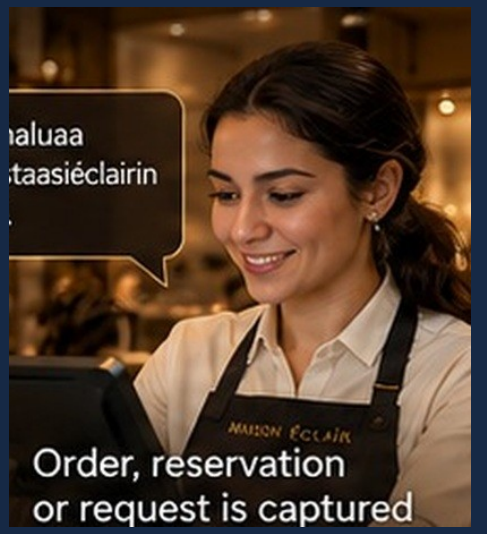

When staff and visitors cannot understand each other, an order may never happen.

VISITOR

“I would like to order…”

AI detects intent and helps in the local language

BUSINESS

A language barrier should not become a lost customer.

One AI service. Three ways to help customers.

The web assistant is working; the dedicated in-store translator workflow is the next module.

01 WEBSITE VOICE

A visitor speaks into the browser; Gemini helps find products, ask prices, order or request a booking.

No purchased phone number required.

02 PHONE RECEPTION

Customers call a real business number. The assistant can answer, identify intent and connect to business workflows.

Current PoC uses Asterisk; multi-tenant PBX is planned.

03 IN-STORE TRANSLATOR

Walk-in customers speak their own language; staff see or hear the translated request.

Planned two-way counter/tablet workflow; not yet live.

A multilingual front desk — not only a website builder.

Make every visitor feel understood.

The goal is broad multilingual service — with language-by-language quality validation before commercial promises.

UP TO

~90

TARGET LANGUAGES

Design target, not 90 languages individually verified in production.

English → Finnish

Arabic → Swedish

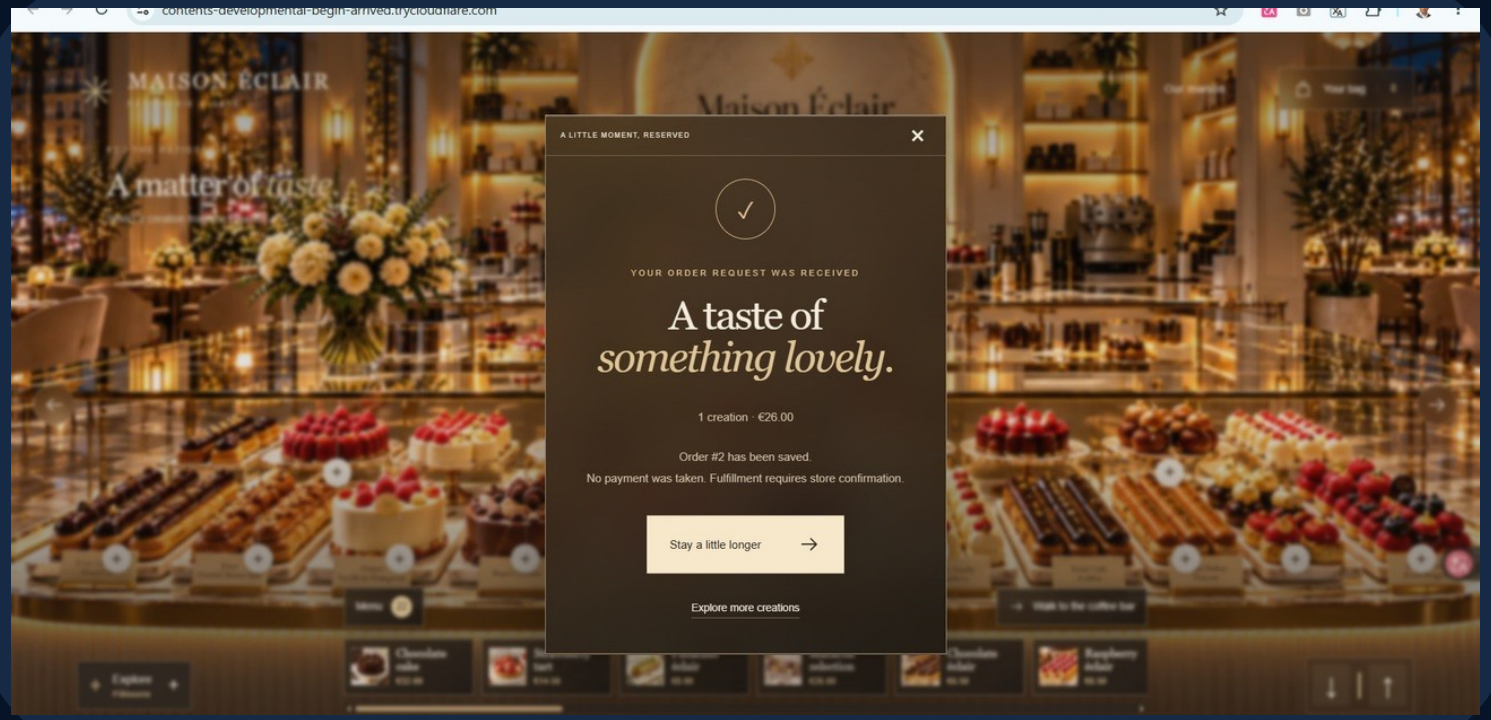

German → Persian

… language switching can occur during a conversation.

Website, phone and future in-store workflows should share the same business truth.

We already built a working demonstration.

Maison Éclair has been integrated and manually tested on AWS; it is not a commercial multi-tenant rollout.

LIVE DEMO

Maison Éclair

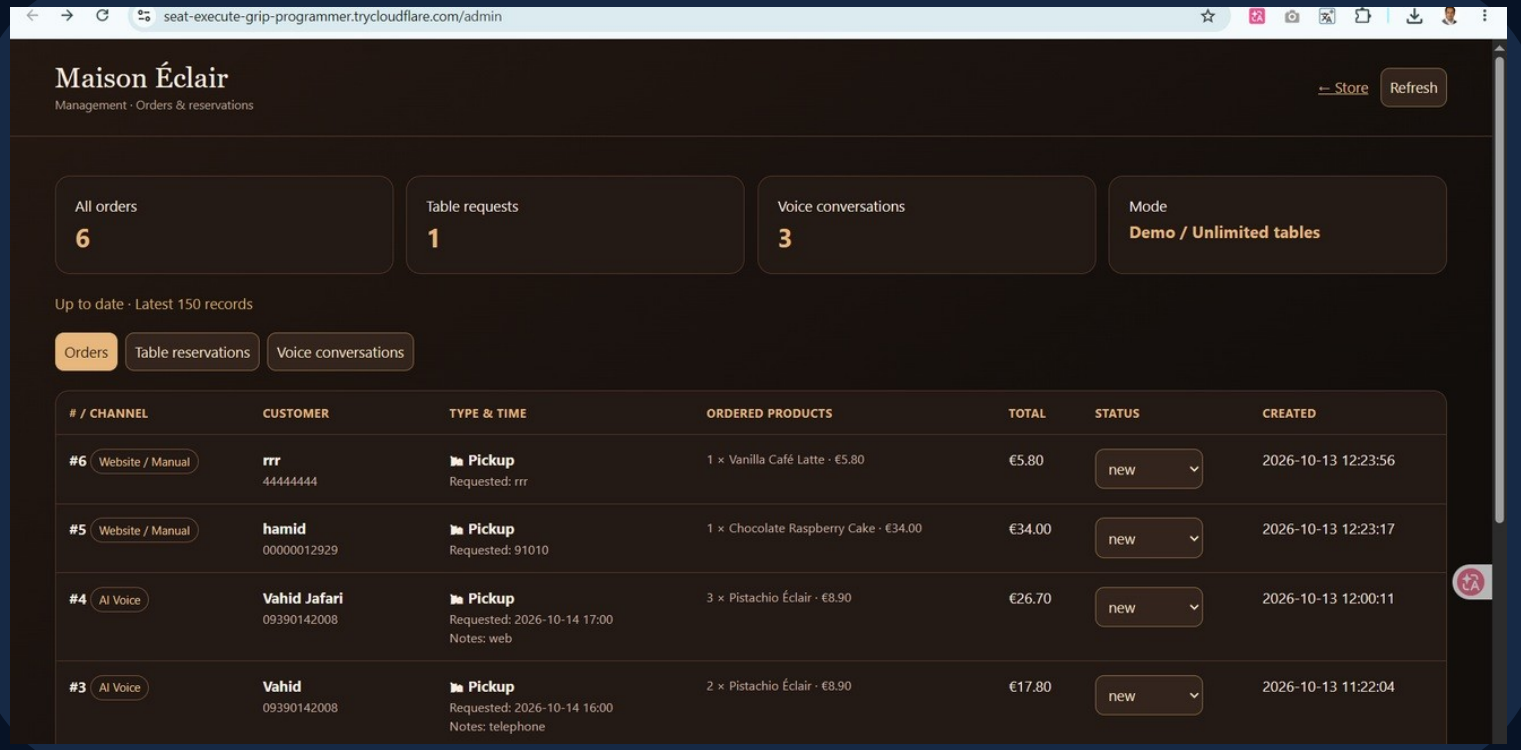

3D shop · Gemini Live · Orders · Reservations · Admin · Telegram

Prototype ~50% complete (founder estimate)

seat-execute-grip-programmer.trycloudflare.com

A demo that can actually take requests.

Real manual tests: voice ordering, test reservations, transcripts and Telegram notifications.

ORDER FLOW

Website + AI voice

MANAGER

Order / booking status

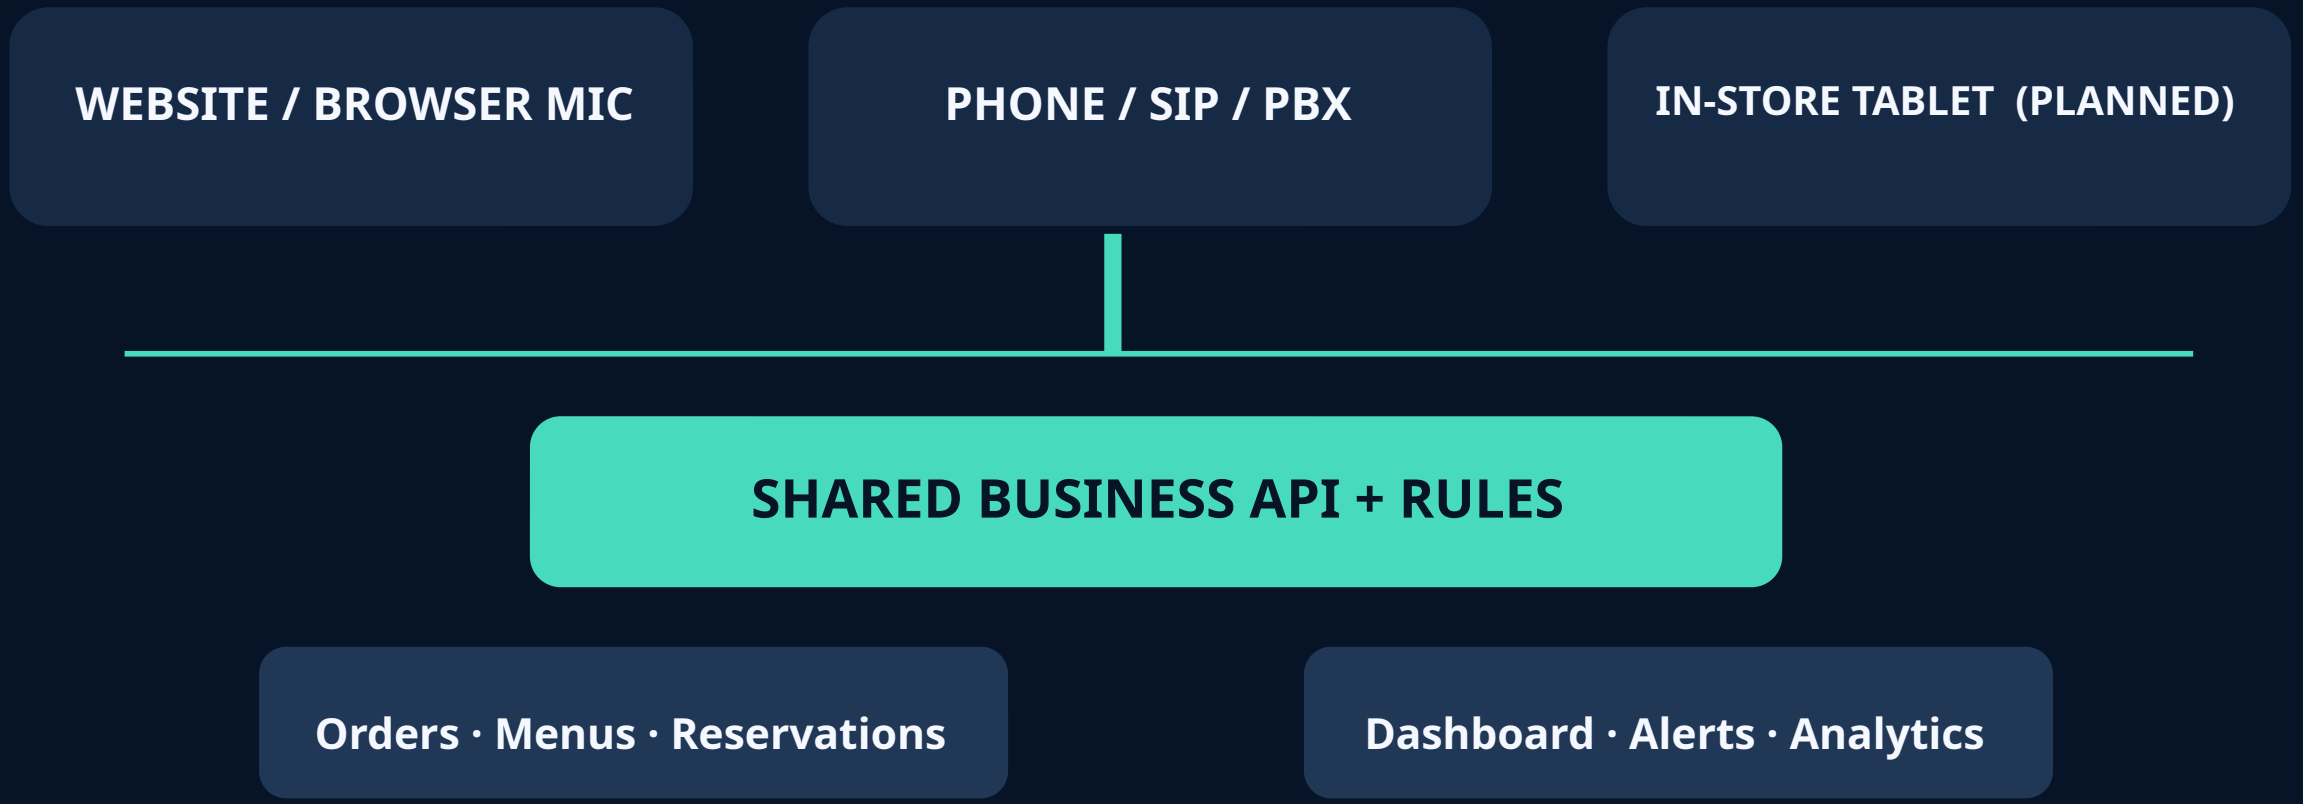

NOTIFICATIONS

Telegram + browser

Test data and technical execution ≠ paying-customer traction.

The phone and website serve the same business.

Each channel identifies the correct business before accessing its menu, booking calendar or tools.

Customers can keep their existing number.

Start with browser voice at no phone-number cost, and add SIP only when needed.

NO PHONE NUMBER

Customer starts with browser microphone and secured HTTPS page. Working prototype uses WebSocket PCM; WebRTC is a future option.

NEW NUMBER / SIP

A customer may obtain a local DID or SIP trunk from a provider; incoming calls route to their tenant and AI receptionist.

KEEP OLD NUMBER

Forward the existing number to a DID/SIP endpoint, or consider porting where the carrier supports it.

FusionPBX / FreeSWITCH multi-tenancy is the planned production telephony platform.

A modular platform — not a single compulsory website.

Businesses can start with what they need. Pricing is intentionally left open until pilots.

AI RECEPTIONIST

AI website voice
Optional real phone integration
Menus, information, requests
Manager notifications

Price: € _____

SMART COMMERCE

Storefront + products
Orders / reservations
CMS + simple analytics
Gemini voice option

Price: € _____

IMMERSIVE PREMIUM

2.5D / 360 / 3D storefront
Interactive product hotspots
Photo / media onboarding
Growth services

Price: € _____

Scope, usage limits and pricing to be validated with actual merchants.

Two months to prove value. No upfront barrier.

Pilot proposal: a defined scope of website, visual onboarding and AI assistance with free access during the test.

2 MONTHS

FREE PILOT

Pilot package; scope, fair use and consent to be documented.

WHAT IS INCLUDED

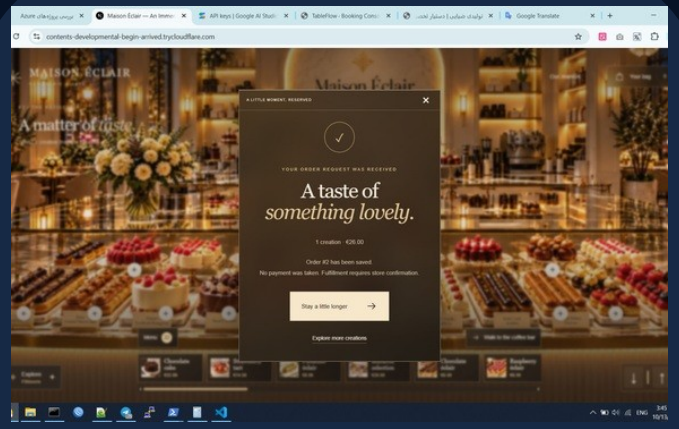

Website / business setup, visual content and photography where feasible; hosted subdomain + SSL; browser AI receptionist / translator trial; dashboard and notifications.

No purchased domain or phone number needed to begin. Optional SIP and custom domain can be added later.

Real deployment costs will be measured during pilot; no public cost claim in this deck.

From photographs to an interactive digital shop.

Real photography can replace AI-generated demo images without rewriting website logic.

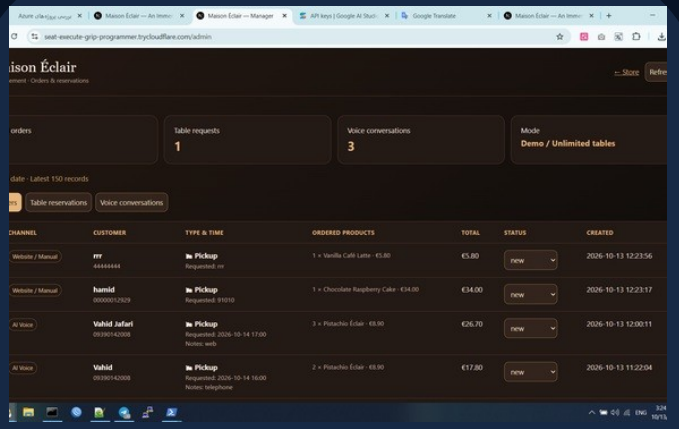

EXTERIOR + INTERIOR

Named media slots: entrance, room, counter and products

SCENES + HOTSPOTS

Camera path, click targets, mobile fallback

CONTENT + BUSINESS DATA

Managed CMS for menu, prices, contact and orders

We help merchants attract customers — not just launch a site.

Traffic analytics plus practical acquisition tools connect exposure to orders, calls and bookings.

DISCOVERY

Local SEO + Google Maps
Search visibility
Social / referral links
QR and local campaigns

BEHAVIOR

Visits and time-of-day
Page / scene engagement
Product hotspot clicks
Cart and checkout funnel

CONVERSION

Bookings and orders
AI voice outcomes
Missed-call trends
Follow-up and retention

Privacy-aware analytics and cross-promotion require consent and tenant controls.

One experienced cloud team. Many isolated customer environments.

Shared management and selective runtime isolation reduce duplicated setup and enable independent restarts.

CENTRAL CONTROL / CMS / PROVISIONING / MONITORING

TENANT A

Restaurant
CPU / RAM limit

TENANT B

Bakery
CPU / RAM limit

TENANT C

Florist
CPU / RAM limit

Shared AI Gateway • FusionPBX (planned) • Business APIs • Data isolation

One host is not fault isolation: scaling, monitoring and backups still matter.

Launch on our secure subdomain. Upgrade to any custom domain.

Customers should not have to purchase a domain before they can experience the product.

PILOT / TRIAL

restaurant.ourplatform.com

Subdomain under our domain
HTTPS / SSL managed centrally
A preview can be private until approved

No customer domain purchase needed.

AFTER APPROVAL

restaurantbrand.fi

Attach an existing or newly purchased domain
TLS + verified domain routing
One change in the Super Admin

Customer can retain domain ownership.

No dependence on temporary trycloudflare URLs for commercial websites.

Built in Tampere. Not limited by city, country or sector.

One platform core; each industry receives the right template, workflow and local compliance settings.

RESTAURANT

Menus · tables · delivery

BAKERY

Products · pickup · orders

FLORIST

Bouquets · occasions · delivery

SALON

Services · appointments

RETAIL

Catalogues · sales

OTHER SERVICES

Configurable forms · AI help

Local language, telecommunications, privacy and service-specific rules need validation.

Technical execution is our strongest starting asset.

Experienced cloud architecture, networking, VoIP and production automation rather than outsourced core delivery.

Vahidreza Jafary

Senior Cloud Architect

14 YEARS IN IT

Microsoft Azure Solutions Architect Expert (awarded 2022)
Cloud / DevOps / infrastructure architecture
Network engineering, automation and multi-tenant design
Experience integrating AI, telephony and web systems

Azure expert-level achievement — credential renewal status to be confirmed.

Real technical credentials — with source documents.

Priority: Azure Solutions Architect Expert and Administrator Associate. Achieved in 2022; validity as shown on certificates.

AZURE SOLUTIONS ARCHITECT EXPERT

Expert-level · achieved Jun 2022

AZURE ADMINISTRATOR ASSOCIATE

Associate · achieved Jun 2022

AZURE FUNDAMENTALS

Fundamentals · achieved Apr 2022

SECURITY / COMPLIANCE

Fundamentals · achieved Apr 2022

Certificates are historical evidence. The Expert and Associate PDFs state validity through June 2023.

A capable team across Finland, Iran and Turkey.

Founder plus three professional specialists abroad, with complementary experience and shared delivery ownership.

CLOUD + DEVOPS

Architecture, automation, monitoring, safe deployments and resource isolation.

AI + VOIP

Gemini Live, telephony workflows, natural language interfaces and operational integration.

WEB + BUSINESS

Customer-facing experiences, administration, business workflows and product implementation.

Individual colleague titles and backgrounds can be documented before the official meeting.

Many students seek jobs. We want to help create opportunities.

A repeatable local business onboarding model can offer different entry points for student skills.

BUSINESS OUTREACH

Visit local businesses and present the product

PHOTOGRAPHY

Capture products, interiors and visual material

WEB IMPLEMENTATION

Themes, CMS, coding and UX

AI OPERATIONS

Conversation testing and support

CLOUD / DEVOPS

Deploy, automate and monitor

CUSTOMER SUCCESS

Onboarding, training and retention

No fixed job count is claimed; hiring will depend on customer demand and funding.

Let the product prove itself in real venues.

A two-month free trial reduces friction and provides measurable learning.

01 INTRODUCE

Student-led local outreach: show the demo and understand the business pain.

02 ONBOARD

Photograph, set up media/menu, provision subdomain and activate browser AI.

03 TEST

Measure real calls, bookings, visitors, languages and business feedback.

04 DECIDE

Use a clear service agreement and propose paid continuation only if valuable.

Early pilots must define consent, security, fair usage and a working human fallback.

AI website builders exist. So do telephony and POS providers.

Our offering is managed business execution across channels — not a claim that competitors lack technical ability.

LOVABLE / BASE44

Fast generation of websites and apps. Custom VoIP, merchant workflow and support may require further work.

WIX / SITE BUILDERS

Strong published commerce, booking and site tools. Voice + translation varies by integration.

VOICE AI SPECIALISTS

Good phone automation. Interactive storefront and end-to-end customer growth may be outside core scope.

OUR TARGET POSITION

Managed site + browser AI + optional phone + in-store translation + orders, data and growth tools.

Positioning hypothesis; independent competitive feature audit still required.

We sell operating outcomes — not generated code.

The owner should not need to assemble a cloud architect, VoIP engineer, developer and AI specialist.

NO COMPLEX SETUP

Shared hosting and centrally managed operations

LANGUAGE ACCESS

AI can help international visitors communicate

EVERY CHANNEL

Website, in-store and optional phone workflow

REAL ACTIONS

Orders, reservations and alerts in one dashboard

BUSINESS GROWTH

SEO, visitor analytics and campaigns

MANAGED SERVICE

Onboarding, updates and ongoing assistance

Reduced hiring friction is a proposed advantage, not a validated cost saving.

Recurring service, with flexible usage and managed add-ons.

All pricing and forecasts intentionally left blank pending real pilot data.

AFTER THE FREE PILOT

Monthly platform subscription € _____
AI / telephony usage € _____
Optional managed content € _____
Optional premium 3D upgrade € _____

HOW THE MODEL SCALES

Centralized architecture
Selective per-tenant container isolation
Repeatable photography + CMS onboarding
Automation of updates and monitoring
Add specialist capacity as demand grows

No ARR, salaries, customer forecasts or fixed job figures are presented.

Begin in Tampere — deliver worldwide.

The platform is designed to be portable; local phone, privacy and payment requirements will be handled market-by-market.

TAMPERE

University ecosystem + real-world merchant pilots

FINLAND

Repeatable local processes and references

EUROPE

Language expansion, regulatory fit and partners

GLOBAL

Tenant templates + managed cloud infrastructure

No claim that all countries or industries can launch without local adaptation.

Build what can be sold. Automate what becomes repeatable.

Keep a credible path from the working single-business demo to a multi-tenant service.

NOW

Working Maison demo; fix voice reliability and operations

PILOT

Restaurant + browser AI + in-store translation test

PLATFORM

Shared CMS, tenant isolation, FusionPBX PoC

GROWTH

Templates, partner onboarding, analytics and global readiness

Milestones depend on measured pilot demand, reliability and unit costs.

We know what still needs to be proven.

Credibility comes from a working prototype, explicit limitations and a plan to test the risky parts.

LANGUAGE QUALITY

90-language target needs real tests, accents and staff feedback

RELIABILITY

Audio quality, call handoff, outages and false responses

PRIVACY

EU GDPR consent, transcripts, retention and data isolation

ECONOMICS

AI minutes, photography and support may exceed estimates

TELEPHONY

SIP carrier requirements, forwarding and availability

MARKET

Merchant willingness to pay after the free pilot

One source of truth, confirmation-before-write and human fallback are product principles.

Tampere is the launchpad — and a talent network.

The project can provide industry exposure for students while building a scalable international product.

TAMK + HUBS

Mentoring, student connections, product feedback, technical contributors and entrepreneurship coaching.

CITY + ENSIMETRI

Startup advice, business-plan support, suitable public-sector contacts and introductions to pilot venues.

ECOSYSTEM + PARTNERS

Photographers, agencies, SME networks, developers and industry-specific mentors.

We seek opportunities to build jobs, not a guaranteed employment count.

HELP US TURN A WORKING AI PROTOTYPE INTO A GLOBAL BUSINESS SERVICE.

We are looking for pilot venues, mentors, entrepreneurship guidance and technical/student collaborators.

LIVE DEMO https://seat-execute-grip-programmer.trycloudflare.com/

Sources, evidence and honest limitations.

The live demonstration and supplied credentials document execution; the new platform and in-store mode are planned.

LIVE DEMO: https://seat-execute-grip-programmer.trycloudflare.com/

PRODUCT PROOF: Maison Éclair AWS prototype, developer manual tests, October 2026

FOUNDER: Microsoft certificates provided by founder. Architect Expert and Azure Administrator PDFs were awarded in 2022 and state validity through 2023; current renewal status not confirmed.

SUPPORT: https://hubs.fi/en/ | https://www.ensimetri.fi/en/

MARKET: https://stat.fi/en/statistics/yrti

COMPARABLES: Lovable, Base44, Wix Restaurants and voice-specialist offerings

DISCLOSURE: Revenue, prices, job count, global launches, FusionPBX multi-tenancy and in-store translation are not represented as achieved commercial results.

What is demonstrated vs what is planned?

A precise picture for advisors who want to assess technical and commercial readiness.

BUILT / MANUALLY TESTED

Maison interactive storefront
Gemini Live browser microphone
Asterisk phone bridge, orders and reservations
Manager view, transcripts and Telegram
AWS services and auto-start

ROADMAP / REQUIRES VALIDATION

Dedicated in-store interpreter workflow
Multi-tenant FusionPBX + provisioning
Shared CMS and per-tenant cloud runtime
SEO, growth automation and analytics suite
90-language quality tests and commercial pilots

This is a prototype-based startup concept, not an established commercial SaaS.
